Setters is a unique business which specializes in supporting companies who are involved in potential high risk activities such as oil and gas, construction, power generation, heavy manufacturing, engineering, and facilities management.

The company was formed in 1992 and has developed its portfolio to support and lead its clients through the systems and training approach to risk management to a coaching and performance improvement style with stunning effect. Many of our clients now expect and achieve an environment which delivers 'zero harm' performance, as a bonus they get better at most other things that they do!
